Ahmed Shaban Saad

Frontend Developer

+201114026722 | Email | Portfolio | LinkedIn | GitHub | Cairo, Egypt

---

Summary

As a front-end developer with over a year of experience, I specialize in creating responsive and visually engaging websites. I possess strong leadership abilities, effective time management, and a dedication to maintaining high professional standards. I thrive under pressure and believe in driving positive and impactful results in every project I undertake. Constantly aiming to enhance my skills, I am committed to bringing innovation and creativity to any team while inspiring collaboration and unity.

Experience

Self-Employed - Frontend Developer   **(**Dec 2022 – Present**)**

- Engaged in continuous self-learning and skill enhancement in front-end development.
- Designe, developed, and deployed multiple personal projects using modern web technologies.
- Regularly updated projects and code samples on GitHub and LinkedIn to showcase progress and expertise.
- Focused on mastering responsive web design, UI/UX principles, and integration with APIs to build interactive and dynamic applications.
- Dedicated to staying up-to-date with industry trends and best practices to deliver high-quality, maintainable code.
- Continuously exploring new tools and frameworks to push the boundaries of web development and improve personal performance.

Projects

E-commerce Website   Demo | Repo | LinkedIn video

It is an admin dashboard project and consists of several pages, which are the main page,team ,contact , profile, calender, FAQ page, and a number of pages using the nivo library. The site is characterized by changing the mode from dark to light .

Technologies Used (React - Material UI - Axios - Swiper js - React Hook Form - Redux Toolkit (RTK) - Real Backend by Strapi - React Image Gallery - Framer Motion)

CRUD management system   Repo | LinkedIn video

In this project, I paid more attention to the technical part than the design , application focusing on authentication and authorization, token management, protected routes, and session persistence. The project features a dashboard with multiple pages, along with login and registration functionalities.

Technologies Used (React - React-Bootstrap - SweetAlert - Real Backend by php laravel - Real Apis from this Backend)

Admin Dashboard   Demo | Repo | LinkedIn video

It is an admin dashboard project and consists of several pages, which are the main page,team ,contact , profile, calender, FAQ page, and a number of pages using the nivo library. The site is characterized by changing the mode from dark to light .

Technologies Used (React - Material UI - nivo js - Fullcalendar js - React Hook Form)

My Portfolio   Demo | Repo

This is built with React and showcases my skills through sections like Home, About, Experience, Projects, and Contact. It includes a responsive design, supporting all screen sizes, with both dark and light modes. The project highlights my expertise and features a detailed display of my work and accomplishments. - **Technologies Used (React - Material UI – Json file - Formik - Framer Motion - Formspree)**

Fitness Exercises App   Demo | Repo | LinkedIn video

A fitness website providing educational videos and detailed exercise guides, with additional YouTube-sourced content for exploring more exercises and finding the best fit for individual needs. **Technologies Used (React - Material UI - React-Loader-Spinner - Swiper js - Rapid's API and real api with key)**

Deneb Template   Demo | Repo | LinkedIn video

It is a template for applying React JS and the idea of components and using them in the correct way. It consists of several components such as the home page, services, blogs, contact, and portfolio.
Technologies Used (React - React-Bootstrap - Swiper js)
